

## MODULE 1

1.1	Writing Four-Digit Number Names and Numerals	8
1.2	Revising Four-Digit Numbers	10
1.3	Analysing Four-Digit Numbers	12
1.4	Building a Picture of 10 000	14
1.5	Reading and Writing Five-Digit Numbers	16
1.6	Analysing Five-Digit Numbers	18
1.7	Comparing and Ordering Four- and Five-Digit Numbers	20
1.8	Rounding Five-Digit Numbers	22
1.9	Reinforcing Rounding with Five-Digit Numbers	24
1.10	Introducing the Ones Multiplication Facts	26
1.11	Introducing the Zeros Multiplication Facts	28
1.12	Reinforcing the Ones and Zeros Multiplication Facts	30

## MODULE 2

2.1	Revising Addition Strategies	32
2.2	Revising Subtraction Strategies	34
2.3	Estimating with Addition and Subtraction	36
2.4	Revising Informal Methods to Add Three-Digit Numbers	38
2.5	Introducing the Formal Addition Algorithm	40
2.6	Working with the Formal Addition Algorithm (Composing Tens)	42
2.7	Working with the Formal Addition Algorithm (Composing Hundreds)	44
2.8	Using the Formal Algorithm to Add Three-Digit Numbers	46
2.9	Solving Problems Involving Addition	48
2.10	Revising Analog and Digital Times	50
2.11	Introducing am and pm Notation	52
2.12	Revising Time Measurement	54

## MODULE 3

3.1	Introducing the Fours Multiplication Facts	56
3.2	Reinforcing the Fours Multiplication Facts	58
3.3	Introducing the Eights Multiplication Facts	60
3.4	Reinforcing the Eights Multiplication Facts	62
3.5	Exploring Patterns with the Eights Multiplication Facts	64
3.6	Solving Word Problems Involving Multiplication	66
3.7	Revising the Relationship Between Multiplication and Division	68
3.8	Solving Word Problems Involving Division	70
3.9	Creating and Conducting a Survey to Collect Data	72
3.10	Exploring Column Graphs	74
3.11	Introducing Many-to-One Picture Graphs	76
3.12	Working with Picture Graphs	78

## MODULE 4

4.1	Recording Subtraction of Two- and Three-Digit Numbers	80
4.2	Exploring Written Methods for Subtraction	82
4.3	Revising Informal Algorithms for Subtraction	84
4.4	Introducing the Formal Subtraction Algorithm	86
4.5	Working with the Formal Subtraction Algorithm (Decomposing Tens in Two-Digit Numbers)	88
4.6	Working with the Formal Subtraction Algorithm (Decomposing Tens in Three-Digit Numbers)	90
4.7	Working with the Formal Subtraction Algorithm (Decomposing Hundreds)	92
4.8	Exploring Subtraction Involving Zero	94
4.9	Consolidating Subtraction Methods	96
4.10	Reading Scales and Comparing Mass	98
4.11	Building a Picture of Grams	100
4.12	Solving Problems Involving Grams and Kilograms	102

## MODULE 5

5.1	Introducing and Reinforcing the Ones and Zeros Division Facts	104
5.2	Introducing and Reinforcing the Fours Division Facts	106
5.3	Introducing and Reinforcing the Eights Division Facts	108
5.4	Identifying Equivalent Fractions (Length Model)	110
5.5	Identifying Equivalent Fractions (Area Model)	112
5.6	Identifying Equivalent Fractions (Number Line Model)	114
5.7	Comparing Fractions (Number Line Model)	116
5.8	Converting Between Centimetres and Millimetres	118
5.9	Converting Between Metres and Centimetres	120
5.10	Exploring the Perimeter of Irregular Polygons	122
5.11	Reading Temperatures on a Scale	124
5.12	Working with Temperature	126

## MODULE 6

6.1	Revising the Formal Addition Algorithm (Composing Tens)	128
6.2	Using the Formal Addition Algorithm (Composing Hundreds)	130
6.3	Using the Formal Addition Algorithm (Regrouping in Any Place)	132
6.4	Using the Formal Addition Algorithm with Large Numbers	134
6.5	Solving Word Problems Involving Addition	136
6.6	Introducing the Nines Multiplication Facts	138
6.7	Reinforcing the Nines Multiplication Facts	140
6.8	Introducing and Reinforcing the Nines Division Facts	142
6.9	Joining 2D Shapes	144
6.10	Splitting 2D Shapes	146
6.11	Identifying Transformations	148
6.12	Analysing and Creating Tessellating Designs	150

## MODULE 7

7.1	Introducing the Sixes Multiplication Facts	152
7.2	Reinforcing the Sixes Multiplication Facts	154
7.3	Consolidating Multiplication Facts with Threes and Sevens	156
7.4	Working with All Multiplication Facts	158
7.5	Introducing and Reinforcing the Sixes and Last Division Facts	160
7.6	Comparing Areas Using Familiar Metric Units	162
7.7	Using Multiplication to Calculate Area	164
7.8	Developing a Rule to Calculate the Area of Rectangles	166
7.9	Calculating Area in Square Centimetres	168
7.10	Interpreting and Constructing Many-to-One Picture Graphs	170
7.11	Comparing Column Graphs	172
7.12	Working with Different Data Displays	174

## MODULE 8

8.1	Revising the Formal Subtraction Algorithm (Decomposing Tens or Hundreds)	176
8.2	Using the Formal Subtraction Algorithm (Decomposing Multiple Places)	178
8.3	Using the Formal Subtraction Algorithm with Large Numbers	180
8.4	Analysing Decomposition Across Places Involving Zero with Large Numbers	182
8.5	Consolidating the Formal Subtraction Algorithm	184
8.6	Describing Angles	186
8.7	Measuring Angles Using Informal Units	188
8.8	Drawing Angles of Various Sizes	190
8.9	Measuring Time Intervals in Minutes	192
8.10	Converting Between Units of Time (Hours and Minutes)	194
8.11	Converting Between Units of Time (Days and Weeks)	196
8.12	Working with Timetables and Duration	198

## MODULE 9

9.1	Relating Multiples and Factors	200
9.2	Finding Pairs of Factors	202
9.3	Introducing the Double-and-Halve Strategy for Multiplication	204
9.4	Constructing Factor Trees	206
9.5	Using the Associative and Commutative Properties of Multiplication	208
9.6	Reinforcing the Associative and Commutative Properties of Multiplication	210
9.7	Using the Distributive Property of Multiplication	212
9.8	Consolidating Multiplication Strategies	214
9.9	Describing and Extending Number Patterns Involving Multiplication	216
9.10	Finding and Applying Rules in Number Patterns Involving Multiplication	218
9.11	Investigating the Result of Adding and Subtracting Odd and Even Numbers	220
9.12	Investigating the Result of Multiplying Odd and Even Numbers	222

## MODULE 10

10.1	Exploring Equivalent Fractions with Tenths and Hundredths	224
10.2	Introducing Decimal Fractions	226
10.3	Locating and Comparing Tenths	228
10.4	Exploring Hundredths	230
10.5	Writing Hundredths as Decimal Fractions (without Teens or Zeros)	232
10.6	Writing Hundredths as Decimal Fractions (with Teens and Zeros)	234
10.7	Locating Decimal Fractions on a Number Line	236
10.8	Relating Common Fractions and Decimal Fractions	238
10.9	Revising Litres and Introducing Millilitres	240
10.10	Relating Millilitres and Litres	242
10.11	Converting Between Litres and Millilitres	244
10.12	Solving Problems Involving Millilitres	246

## MODULE 11

11.1	Revising Division Models	248
11.2	Relating Multiplication and Division	250
11.3	Solving Problems Involving Multiplication and Division	252
11.4	Modelling Division Involving Remainders	254
11.5	Solving Division Problems with Remainders	256
11.6	Using an Inverse Strategy to Divide	258
11.7	Introducing a Partitioning Strategy to Divide Two-Digit Numbers	260
11.8	Reinforcing the Partitioning Strategy to Divide Two-Digit Numbers	262
11.9	Representing Prisms and Cylinders	264
11.10	Representing Pyramids and Cones	266
11.11	Sketching and Identifying Different Viewpoints	268
11.12	Using Grids to Draw 3D Objects	270

## MODULE 12

12.1	Finding Unknown Quantities Involving Addition	272
12.2	Finding Unknown Quantities Involving Subtraction	274
12.3	Working with Equivalent Number Sentences	276
12.4	Solving Problems Involving Money	278
12.5	Calculating Change (without Rounding)	280
12.6	Calculating Change (with Rounding)	282
12.7	Introducing Compass Points on a Map	284
12.8	Using a Legend and Direction to Interpret a Map	286
12.9	Using Scale and Direction to Interpret a Map	288
12.10	Describing the Probability of Everyday Chance Events	290
12.11	Ordering the Likelihood of Chance Events	292
12.12	Exploring the Order of Chance Events	294

<b>Index</b>		296
