Investigating Numerical Patterns

1	2	3	4	5	6	7	8	9
2	4	6	8	10	12	14	16	18
3	6	9	12	15	18	21	24	27
4	8	12	16	20	24	28	32	36
5	10	15	20	25	30	35	40	45
6								
7								
8								
9								

1. Look at the numbers in the first five rows. Write about two patterns you see.

2. Use patterns you see to help you complete the chart.

3. Colour the last row and column red. What do you notice?

4. Colour the diagonal that begins at the top left. What do you notice?

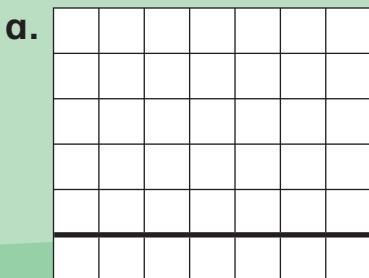

5. Colour the diagonal that begins at the top right. What do you notice?

6. Choose a number from the top row. Add it to the number directly below. Where is the answer?

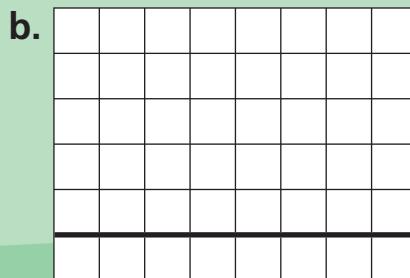

Revising the Use-a-Known-Fact Strategy

OUTCOME
NS 2.3

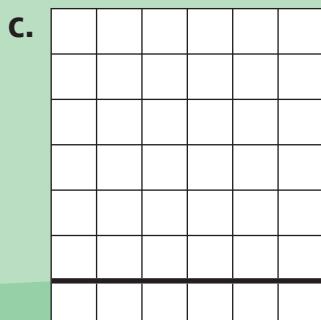

1. Colour the grid to match the first fact. Then write the answers.

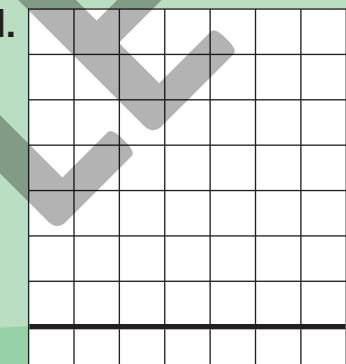

$5 \times 7 = \underline{\quad}$ SO $6 \times 7 = \underline{\quad}$

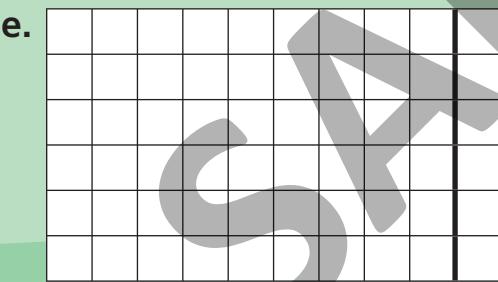

$5 \times 8 = \underline{\quad}$ SO $6 \times 8 = \underline{\quad}$

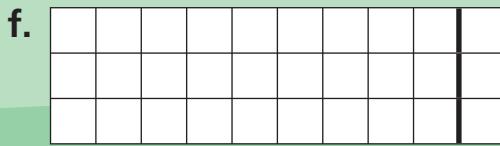

$6 \times 6 = \underline{\quad}$ SO $7 \times 6 = \underline{\quad}$

$7 \times 7 = \underline{\quad}$ SO $8 \times 7 = \underline{\quad}$

$6 \times 10 = \underline{\quad}$ SO $6 \times 9 = \underline{\quad}$

$3 \times 10 = \underline{\quad}$ SO $3 \times 9 = \underline{\quad}$

2. Write the answer to the first fact to help you answer the second fact.

a. $5 \times 4 = \underline{\quad}$

SO $6 \times 4 = \underline{\quad}$

b. $10 \times 7 = \underline{\quad}$

SO $9 \times 7 = \underline{\quad}$

c. $10 \times 4 = \underline{\quad}$

SO $9 \times 4 = \underline{\quad}$

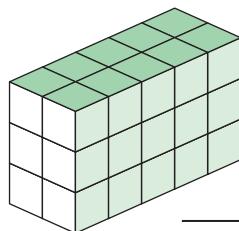

Multiplying with Three Factors

OUTCOME
NS 2.3

Follow these steps to calculate how many cubes are in each box shape.

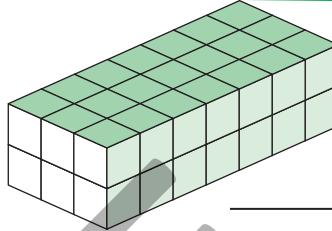

- Write the dimensions of the box shape.
- Write the dimensions in the order that you would multiply.
- Write the total.

a.

 $\underline{\quad} \times \underline{\quad} \times \underline{\quad} = \underline{\quad}$

b.

 $\underline{\quad} \times \underline{\quad} \times \underline{\quad} = \underline{\quad}$

c.

 $\underline{\quad} \times \underline{\quad} \times \underline{\quad} = \underline{\quad}$

d.

 $\underline{\quad} \times \underline{\quad} \times \underline{\quad} = \underline{\quad}$

e.

 $\underline{\quad} \times \underline{\quad} \times \underline{\quad} = \underline{\quad}$

f.

 $\underline{\quad} \times \underline{\quad} \times \underline{\quad} = \underline{\quad}$

g.

 $\underline{\quad} \times \underline{\quad} \times \underline{\quad} = \underline{\quad}$

h.

 $\underline{\quad} \times \underline{\quad} \times \underline{\quad} = \underline{\quad}$

Finding Factors

OUTCOME
NS 2.3

Write all the factors of each number.

a. **15**
is the same as

<input type="text"/>	\times	<input type="text"/>
<input type="text"/>	\times	<input type="text"/>

b. **25**
is the same as

<input type="text"/>	\times	<input type="text"/>
<input type="text"/>	\times	<input type="text"/>

c. **14**
is the same as

<input type="text"/>	\times	<input type="text"/>
<input type="text"/>	\times	<input type="text"/>

d. **16**
is the same as

<input type="text"/>	\times	<input type="text"/>
<input type="text"/>	\times	<input type="text"/>
<input type="text"/>	\times	<input type="text"/>

e. **28**
is the same as

<input type="text"/>	\times	<input type="text"/>
<input type="text"/>	\times	<input type="text"/>
<input type="text"/>	\times	<input type="text"/>

f. **18**
is the same as

<input type="text"/>	\times	<input type="text"/>
<input type="text"/>	\times	<input type="text"/>
<input type="text"/>	\times	<input type="text"/>

g. **24**
is the same as

<input type="text"/>	\times	<input type="text"/>
<input type="text"/>	\times	<input type="text"/>
<input type="text"/>	\times	<input type="text"/>
<input type="text"/>	\times	<input type="text"/>

h. **64**
is the same as

<input type="text"/>	\times	<input type="text"/>
<input type="text"/>	\times	<input type="text"/>
<input type="text"/>	\times	<input type="text"/>
<input type="text"/>	\times	<input type="text"/>

i. **30**
is the same as

<input type="text"/>	\times	<input type="text"/>
<input type="text"/>	\times	<input type="text"/>
<input type="text"/>	\times	<input type="text"/>

j. **36**
is the same as

<input type="text"/>	\times	<input type="text"/>
<input type="text"/>	\times	<input type="text"/>
<input type="text"/>	\times	<input type="text"/>
<input type="text"/>	\times	<input type="text"/>

k. **80**
is the same as

<input type="text"/>	\times	<input type="text"/>
<input type="text"/>	\times	<input type="text"/>
<input type="text"/>	\times	<input type="text"/>
<input type="text"/>	\times	<input type="text"/>

l. **100**
is the same as

<input type="text"/>	\times	<input type="text"/>
<input type="text"/>	\times	<input type="text"/>
<input type="text"/>	\times	<input type="text"/>

Exploring Multiples

OUTCOME
NS 2.3

1. a. Write the multiples of 10 up to 100 that you say when you start at 3 and count in threes.

- b. Loop the numbers you say when you start at 3 and count in threes. Use the numbers above to help you.

27 37 42 49 54 62 78 81 88 95

2. a. Write the multiples of 10 up to 100 that you say when you start at 4 and count in fours.

- b. Use the numbers you wrote to help you loop the numbers you would say when you start at 4 and count in fours.

34 36 47 52 60 69 76 85 88 96

3. a. Write the multiples of 10 between 100 and 200 that you say when you count in threes and fours.

Count in threes

Count in fours

- b. Loop the numbers you say when you count in threes.

117 124 135 144 154 162 177 189 193

- c. Loop the numbers you say when you count in fours.

118 128 136 147 152 164 172 188 194
