

How to change your password for Slate.

In order to ensure their ongoing effectiveness, passwords should be changed on a regular basis.

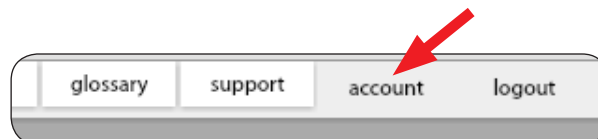

1 Go to origoslate.com and log in.

2 Click [account](#) from the top menu. Select [yes](#) when asked if you wish to exit your current session.

3 When your account details load, scroll to the bottom of the page to the [change password](#) section.

4 Enter your new password in the field provided and then enter it again in the field for confirming the new password. Click [save](#).

It is not good practice to keep a copy of your password written down.

A form titled 'Change Password' with two input fields: 'New password' and 'Confirm new password'. Below the fields is a 'Save' button.A form titled 'Change Password' with two input fields: 'New password' and 'Confirm new password'. Below the fields is a 'Save' button. A red arrow points to the 'Save' button.
